WORK EXPERIENCE (4)

Engineering Manager at [Moneyfarm](#)

Jan 2020 - Current

Moneyfarm is an independent FinTech company.

- Led a team of seven engineers, a product owner and a designer, overseeing all aspects of project planning, execution, and delivery.
- Reviewed and refactored the entire product development lifecycle leveraging AI, driving a ~3x increase in delivery pace and lifting PR throughput from the 75th to consistently above the 90th percentile against industry benchmarks (from early 2026).
- Released on time two of the biggest key initiatives in the company, Thematics and Insurance, creating AUM of multiple million
- Developed and implemented agile processes and standards to improve efficiency and quality with scrum and kanban methodologies.
- Collaborated with cross-functional teams, including design, production, and quality assurance, to ensure seamless project execution.

- Improved team morale and productivity through effective communication and collaboration.
- Coaching and mentoring team members to help them grow as engineers.

Engineer Lead at [Vodafone](#)

Jan 2018 - Dec 2019

Vodafone is one of the world's leading telecommunications groups.

- Led a team of eight engineers overseeing all aspects of project planning, execution, and delivery.
- Release to more than 5 million customers the new Vodafone App with a new UI/UX.
- Coordinated with external vendors and suppliers to ensure timely delivery of materials and equipment, optimizing project timelines and reducing costs.
- Conducted regular team meetings to foster collaboration, share best practices, and identify areas for improvement.
- Acted as a technical expert, providing guidance and support to team members on complex engineering issues.

Senior Mobile Developer and Tech Lead at [Funambol](#)

Feb 2007 - Jan 2018

Funambol is a leader company in white-label personal cloud solutions.

- Led the design and architecture of the iOS App, ensuring the selection of optimal coding practices and patterns.
- Assumed a pivotal role in team organization, effectively taking on Scrum Master responsibilities to streamline project management.
- Directly involved in code development and product enhancement, maintaining hands-on involvement in project execution.
- Actively contributed to the Android App, demonstrating versatility and a commitment to cross-platform expertise.

Software Engineer at [B.L.S. Consulting](#)

Aug 2005 - Dec 2006

B.L.S. is an Internet security consulting company.

- Working on a service acting as interface to the iptables framework on Linux.

PROJECTS (3)

TongueOMeter

Jan 2019 - Current

Flutter Bluetooth iOS Android Healthcare FDA

<https://e2scientific.com/>

Built with Flutter the iOS and Android companion apps for the Tongueometer devices, a healthcare product that helps re-educate people with swallowing disorders.

- Developed the cross-platform apps in Flutter for both iOS and Android.
- Implemented the Bluetooth integration between the apps and the Tongueometer hardware devices.

- As a medical/healthcare product distributed in the U.S.A., the app had to meet and pass FDA approval.

PTActiv App

Jan 2015 - Current

Flutter iOS Android

<https://www.ptactiv.net/>

Built with Flutter the iOS and Android apps for the PTActiv service, which handles booking reservations for tennis courts.

- In charge of the iOS app since 2015; migrated the app completely to Flutter in 2020, then responsible for both iOS and Android.

Schedina App

Jan 2017 - Current

Flutter Firebase Cloud Functions Serverless

<https://unoxdue.it/>

Built with Flutter a small app for betting (no real money) on Serie A results within a group.

- Developed the app in Flutter.
- Built the backend on Firebase serverless: push notifications, remote DB, Cloud Functions, and crash reporting.
